ACADEMIC PROJECTS

2026 **Chatapp**
A multi-client chat system implemented using Java WebSockets, featuring a centralized server that enables real-time communication between connected clients. The user interface is developed using Java Swing.

2026 **Portfolio**
A fully responsive portfolio site built with HTML, CSS, and vanilla JavaScript, featuring a dynamic project gallery and smooth UI interactions to provide an intuitive user experience.

2025 **CampusHub**
A student-focused web application enabling buying and selling of items, reporting lost & found items, and user communication through notifications. Built using React for the frontend with a Node.js, Express.js backend and MySQL database.
Role: Frontend Developer.

2024 **Meteor Blaster**
A fast-paced 2D space shooting arcade game developed in Java using Swing and core Object-Oriented Programming principles, featuring real-time enemy combat and obstacle avoidance.

SKILLS

- Programming: C, C++, Java
- Web: HTML, CSS, JavaScript, React js
- Databases: MySQL
- Tools: Git, Github

COMPETITIVE PROGRAMMING

- Solved 1300+ problems on Codeforces, Leetcode, CodeChef, CSES, etc.
- Max Codeforces Rating: 1343 (Pupil)
- Max Streak: 219 days in a row
- Max CodeChef Rating: 1675 (3 Star)

ACHIEVEMENTS

- Math Olympiad Champion
- Biology Olympiad First Runner-Up
- National Suduko Olympiad First Runner-up
